

Does Twin Cities transit reach the households that depend on it?

Service rises with need, but loosely

High-need, under-served block groups

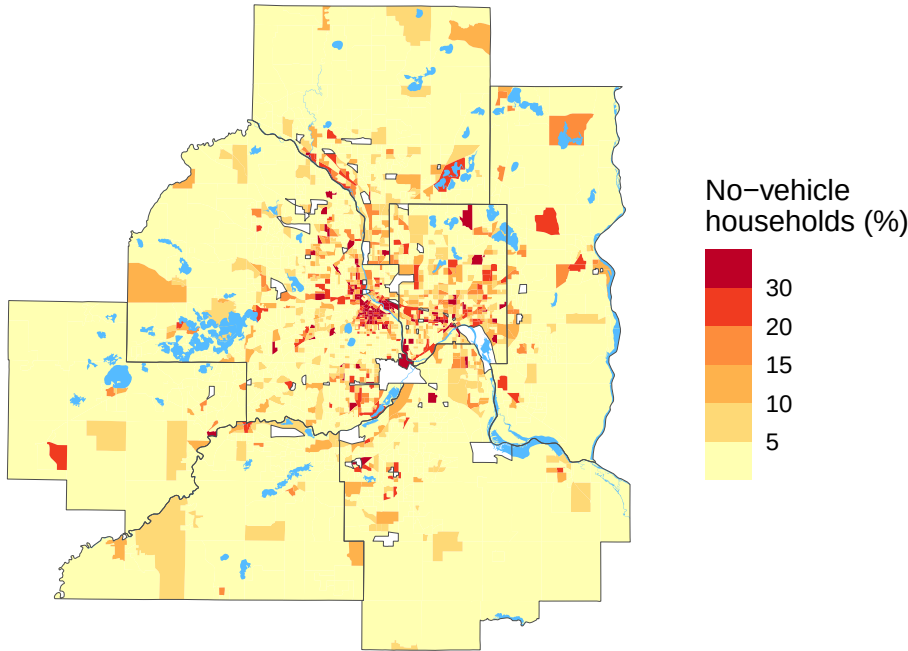

Sources: Metro Transit / Metropolitan Council GTFS (weekday service); U.S. Census Bureau ACS 5-year (2019–2023)

and 2020 population-weighted block-group centers. Seven-county metro, census block-group level.

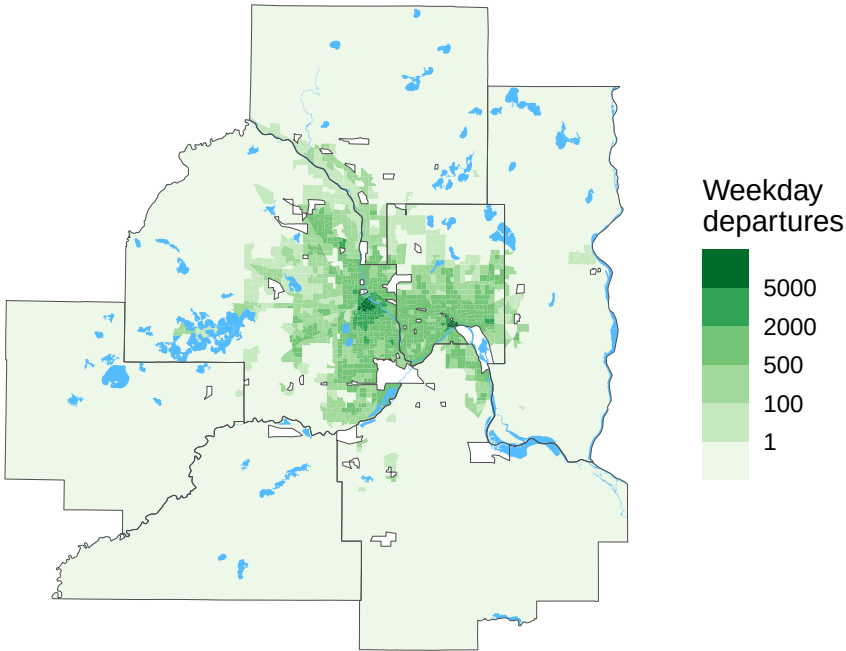

"Need" = share of households with no vehicle; "service" = weekday departures reachable within a 1/2-mile walk of the block group's population center.

The two measures on their own: need, and service

Need: households without a vehicle

Service: weekday departures nearby

Same data and definitions as the preceding page. Seven-county Twin Cities metro, census block groups. Service is weekday departures reachable within a 1/2-mile walk of each block group's population center.
